ABOUT ME

Dedicated and enthusiastic developer with a relentless commitment to excellence and a knack for delivering results on time. I'm on a quest to harness my IT prowess, specializing in the dynamic realms of Frontend Development. Armed with a track record of coding mastery, I'm poised to be the driving force behind realizing your productivity milestones.

EXPERIENCE

Full Stack Developer

Jan 2026 – ongoing

Smaashlabs LLC. remote

Atlanta, USA

- **Technologies:** NextJS, TypeScript, MongoDB, VectorDB, Qdrant, React Native, AI Agents, Voice AI, RAG, LLM Integration, Deepgram
- Developed and maintained scalable full-stack applications using **Node.js, Express.js, React, React Native, MongoDB, and TypeScript**.
- Designed and implemented **AI-powered CEO/COO/PM Agent systems**, enabling automated business analysis, strategic planning, and decision support.
- Built and optimized **Retrieval-Augmented Generation (RAG)** pipelines using **Qdrant Vector Database** for intelligent document search and contextual AI responses.
- Engineered real-time dashboard solutions using **Server-Sent Events (SSE)** and efficient caching strategies to deliver live business insights.
- Developed RESTful APIs with secure authentication, authorization, and role-based access control mechanisms.
- Implemented scalable data persistence architectures using **MongoDB**, improving application reliability and operational efficiency.
- Integrated advanced AI workflows with **Claude, GPT, and other LLMs**, enabling automated report generation, analysis, and recommendation systems.
- Designed and optimized voice-enabled experiences using **Deepgram Speech-to-Text APIs** and WebSocket-based real-time communication.
- Built production-grade frontend interfaces with responsive design, reusable components, and modern UI/UX practices.
- Collaborated with cross-functional teams to deliver enterprise-grade web and mobile solutions following Agile development methodologies.
- Improved application performance through database optimization, API response tuning, caching, and efficient state management techniques.
- Developed and maintained comprehensive documentation, technical specifications, and deployment workflows for internal and client-facing products.
- Participated in architecture design, code reviews, and engineering best practices to ensure maintainability and scalability.
- Contributed to AI-driven business intelligence platforms that transform organizational data into actionable executive insights.

FullStack Developer & Founder

April 2025 – ongoing

[Taleem Portal](#). remote

Karachi, Pakistan

- **Technologies:** NextJS, JavaScript, MongoDB, Socket.IO, JWT
- System Architecture & Planning.
- Built 35+ responsive React components with theme management.
- Proficiently worked with iframes to seamlessly integrate external content.
- Integrated Socket.IO for real-time notifications and live updates.
- Designed MongoDB schema for 10+ interconnected models (Student, Teacher, Admin, Parent, etc.).
- Developed JWT-based multi-role authentication (Admin, Teacher, Parent, Student, SuperAdmin).
- Implemented role-based access control with granular permissions.
- Built comprehensive dashboards with real-time statistics.
- Created customizable report generation with PDF/Excel exports.
- Implemented interactive charts (bar, pie, line) using Recharts.
- Added database indexing and query optimization.

- Advanced filtering, sorting, pagination systems
- Architected scalable multi-tenant system supporting 5 distinct user portals.
- Selected and integrated 20+ technologies (Next.js, MongoDB, Socket.IO, Cloudinary)

Jr. Frontend ReactJS Developer

Mar 2024 – April 2025

Miletap Private Limited . onsite

Karachi, Pakistan

- **Technologies:** ReactJS, JavaScript, Redux-toolkit, CSS, Rest Api, Antd , Tailwind, React-d3-tree, JSON
- Specialized in React.js, focusing on functional components and custom feature-rich modules.
- Implemented REST API integration using Redux Toolkit for efficient state management.
- Proficiently worked with iframes to seamlessly integrate external content.
- Applied knowledge of various React libraries to optimize and extend application features.
- Demonstrated proficiency in leveraging the latest React hooks for enhanced functionality.
- Implemented and customized Chart.js libraries for effective data visualization.

Frontend ReactJS Trainer

June 2024 – Current

Nayee Subah Foundation . onsite

Karachi, Pakistan

- **Technologies:** ReactJS, JavaScript, Redux-toolkit, CSS, Rest Api, TailwindCSS, HTML5
- Taught **9 batches** of students, each spanning **6 to 7 weeks**, with over **200+ students** trained in total.
- Course topics: **HTML5, CSS3, JavaScript, ReactJS.**

Freelancer

Apr 2023 – current (2+yr)

Self - Independent Clients. Remote

freelance

- **Technologies:** ReactJS, JS, CSS, Rest Api,
- Built responsive UIs with ReactJS and TailwindCSS, converting Figma designs into pixel-perfect, interactive web apps.
- Integrated REST APIs for dynamic data handling, ensuring seamless frontend-backend communication.
- ontheway.store one of my freelance projects, which is currently live.
- Produced comprehensive code documentation for clarity and future reference.
- Conducted in-depth development analysis to optimize project performance and efficiency.

Projects

Employee Management System for NSF

June 2025

- Technologies:** Next.js, JavaScript, MongoDB, TailwindCSS, REST API
- Designed and developed a secure **Admin Panel** for NSF using **Next.js**, enabling admin-only access for streamlined employee registration and management.
 - Implemented **MongoDB** for backend data storage, allowing efficient handling of employee records and updates.
 - Built custom modules for **Add, Update, Delete, and View** employee registrations with dynamic filtering options.
 - Applied **TailwindCSS** to create a clean, responsive UI with a modern and professional appearance.
 - Integrated **RESTful API routes** within Next.js for modular, scalable backend logic.

Inventory Management System for Nazeer Friends Communication

July 2025

- Technologies:** Next.js, JavaScript, MongoDB, TailwindCSS, REST API
- Designed and developed a secure **inventory management** for Mobile Shop using **Next.js**, enabling admin-only access for streamlined inventory registration and management.
 - Implemented **MongoDB** for backend data storage, allowing efficient handling of items records and updates.
 - Built custom modules for **Add, Update, Delete, and View** items registrations with dynamic filtering options.
 - Applied **TailwindCSS** to create a clean, responsive UI with a modern and professional appearance.
 - Integrated **RESTful API routes** within Next.js for modular, scalable backend logic.

Landing Page for Online Digital Store - KSA

Sept 2023

- Technologies:** ReactJS, JS, CSS, TailwindCSS, GSAP, Framer Motion
- Built responsive UIs with ReactJS and TailwindCSS, converting Figma designs into pixel-perfect, interactive web apps.
 - Integrated REST APIs for dynamic data handling, ensuring seamless frontend-backend communication.
 - ontheway.store one of my freelance projects, which is currently live.

TECHNICAL SKILLS

- Languages:** JavaScript (EcmaScript), TypeScript, HTML5, and CSS3.
- Frameworks & Libraries:** Next.js, ReactJS, React Native, Node.js, Express.js, Redux Toolkit, Socket.IO, TailwindCSS, Material-UI, Ant Design (Antd), GSAP, and Framer Motion.
- AI & Specialized Technologies:** AI Agents (CEO/COO/PM systems), Retrieval-Augmented Generation (RAG), LLM Integration (Claude, GPT), Voice AI (Deepgram), and Server-Sent Events (SSE).
- Databases & Storage:** MongoDB (Schema Design & Indexing), VectorDB (Qdrant), and Cloudinary.
- Data Visualization:** Chart.js, Recharts, and React-d3-tree.
- Tools & Platforms:** Git, GitHub, GitLab, Bitbucket, Vercel, JWT (Authentication), RESTful APIs, and WebSocket.

EDUCATION

- Sindh Madressatul Islam University - SMIU**
- Karachi, Pakistan
- Bachelor's in computer science*
Oct. 2020 – Oct 2024
- CGPA:** 3.00
